Košice, this June 16, 2003

Our company has elaborated, subject to the company SEWA Consulting s.r. o. request, the assessment of the heating technology, running in our production halls. Since the year 2000, following to the tender, the company SEWA Consulting s.r.o., has installed the light gas fired infra red radiators in the amount of 150 pcs until present. These represent wall to wall and local sector heating and tempering elements used in our production premises.

These appliances proved to be suitable for given conditions for their operational variability, low demand maintenance and in comparison to the other offered radiating appliances the investment costs have been more advantageous. The company SEWA Consulting s.r.o. assumes for us the expert revisions and service of the gas fired heating technology for DZ Obalová vetva, as well

Sincerely

Robert Pristaš
